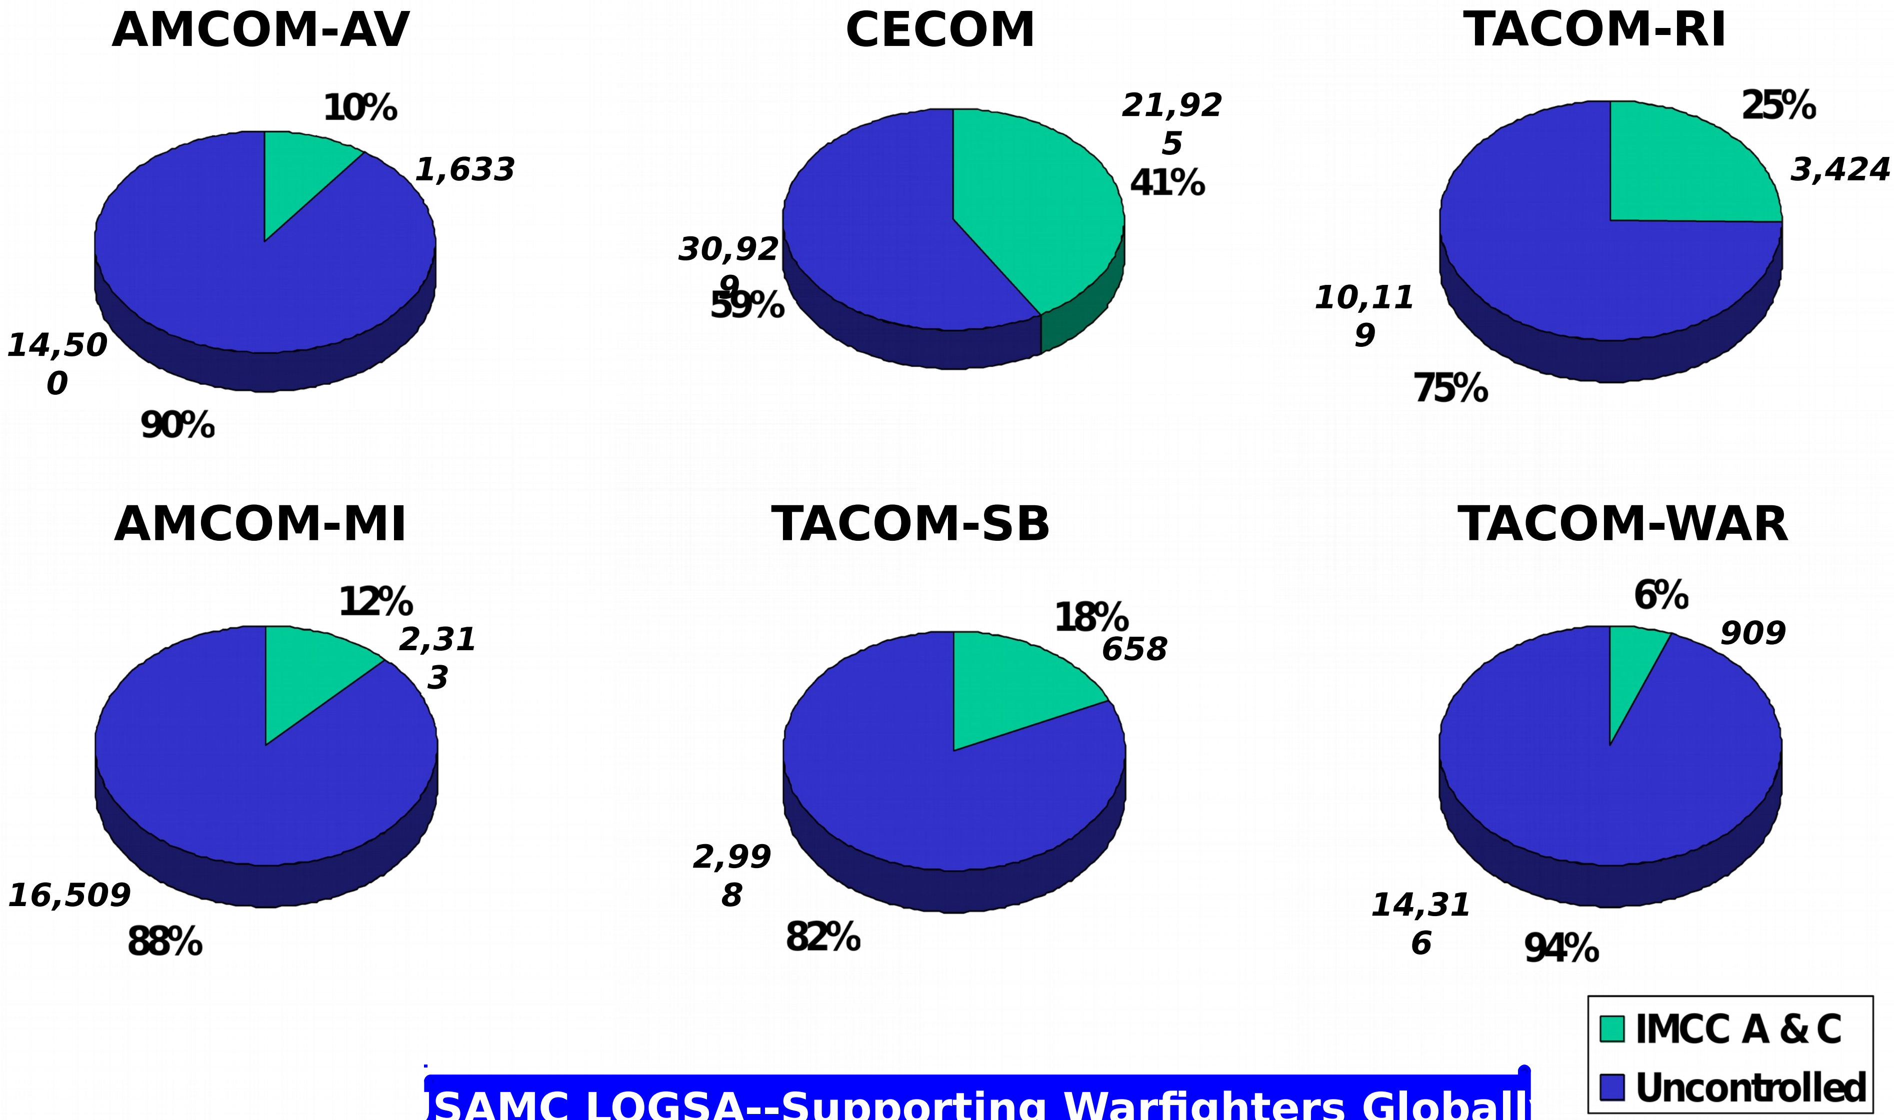
IMCC A and C vs. Online Processing Secondary Items Managed by ICP – Dec 05



Dec 05 data as of 11 Jan 06

Breakout of Controlled Items

	IMCC "A"	IMCC " C"
AMCOM-A	1,183	450
AMCOM-M	1,142	1,171
CECOM	20,867	1,058
TACOM-W	514	395
TACOM-R	1,636	1,788
TACOM-SB	534	124

IMCC "C" requisitions are run thru the Control Item Logic File (CLF). CLF is an IMMC tool that facilitates automatic processing. CLF completes processing for many "C" coded items based on parameters placed in the CLF, e.g., designated DODAACs, priorities, quantities, etc. Only requisitions not meeting CLF parameters will ever kick off-line for processing.
